G342.4.2.1 1 How to Create a Theme

Select any Appropriate Folder for Content

The screenshot shows a web browser window with the URL <http://saeon.dirisa.org/playpen/test-folder>. The page header includes the National Research Foundation and South African Environmental Observation Network logos. A navigation menu contains 'Home', 'Metadata', 'Communities', and 'Tutorial'. A breadcrumb trail reads 'You are here: Home → Playpen → Test Folder'. The main content area features a toolbar with 'Contents', 'View', 'Edit', 'Linked Metadata', 'Rules', and 'Sharing'. Below this, the 'Test Folder' is listed as being created by Wim Hugo on June 02, 2012. A list of sub-folders is displayed: Maps, Images, Atlas, News, Events, and GeoRSS, each with its last modification time. A red callout box with the text 'Test Folders' points to the 'Test Folder' title. The left sidebar contains sections for 'SAEON' (Maps, Images, Atlas, News, Events, GeoRSS), 'Information For ...' (First-Time Users, Data Providers, SAEON Collaborators, Scientists, Systems Developers), and 'Partners' (SAEON, CSIR, Marine and Coastal Management, SANPARKS). The right sidebar includes 'My Portlet 1' and a 'Bulk Uploader' section with a 'Browse' button.
